About this release

This document contains important information about this release of Forcepoint F1E. We strongly recommend that you read the entire document to understand the scope of the release.

Compatibility

The F1E products and versions supported in this release

Operating System (OS)	F1E Products	Version	Build Number
Windows	Forcepoint DLP Endpoint	Forcepoint DLP v8.9.x or later	v26.02.5749
	Forcepoint Web Security Proxy Connect Endpoint	Forcepoint Web Security v8.5.5 or later	
	Forcepoint Web Security Direct Connect Endpoint	Forcepoint Web Security v8.5.5 or later	

Operating System (OS)	F1E Products	Version	Build Number
	Forcepoint Endpoint Context Agent	Forcepoint Next Generation Firewall v6.10 or later	
Mac	Forcepoint DLP Endpoint	Forcepoint DLP v8.9.x or later	v26.02.5014

Support for latest browsers and operating systems

Browsers and operating systems are tested with existing versions of endpoint solutions when they become available. For a full list of supported browsers and operating systems for each endpoint version, see the Certified Product Matrix.

New features in this release

- MV3 Browser Extension Domain Bypass via Custom Configuration
  Administrators can now configure domain-level bypass rules for the MV3 browser extension using the Custom Configuration feature in FSM 10.3 and later.

- Support for F1E DC and Fortra DG DLP Co-installation on macOS
  Added support for running F1E DC and DG DLP together on macOS using MDM-based transparent proxy ordering.

To comply with Google's planned deprecation of Manifest V2, the F1E browser extension has been updated to Manifest V3. This new version includes an updated Manifest V3 version, which builds on the previous Manifest V3 releases. Manifest V3 is applicable for Google Chrome, Microsoft Edge, and Mozilla Firefox browsers on Windows, as well as Google Chrome, Mozilla Firefox, and Safari browsers on macOS. It is crucial that you upgrade to this ManifestV3 extension before Google deprecates Manifest V2. Refer to the Manifest V2 support timeline document to view Google's progress on this effort.

> ⚠️ **Important**
>
> Since Manifest V3 introduces a fundamental design change compared to Manifest V2, it is crucial to review the Resolved and Known Issues section for any known issues before upgrading your browser extension to Manifest V3.

To leverage this updated Manifest V3 extension, you can either upgrade to the new version of the F1E agent or enable the Manifest V3 extension on top of your existing agent installation.

To update the agent, follow the regular installation or upgrade steps outlined in F1E Installation guide and F1E upgrade guide. You can add the Manifest V3 extension on top of an existing agent installation. But first, ensure you are running a supported version of the F1E agent. To check supported versions, see Product Support Lifecycle. For detailed instructions, see the F1E End user guide.

You can now choose to enable or disable print detection for web pages using browser extensions when creating endpoint installation packages. For details on availing of this option, refer to Creating the installation package from the package builder.

Installing and upgrading Forcepoint F1E

Installing Forcepoint F1E

For information about using the package builder, installing Forcepoint F1E agents, or uninstalling Forcepoint F1E agents, see the Installation and Deployment Guide for Forcepoint F1E.

Restarting an endpoint machine after an install or uninstall

When you install or uninstall Forcepoint F1E agents on your endpoint machines, you might need to restart the endpoint machine to complete the install or uninstall. The following table shows the scenarios where a restart is required when you install or uninstall the agent.

Forcepoint F1E agent	Restart required?
Forcepoint DLP Endpoint (Windows)	■ **Install**: Yes ■ **Uninstall**: Yes
Forcepoint DLP Endpoint (Mac)	■ **Install**: No, but an account sign out is required. ■ **Uninstall**: No
Forcepoint Web Security Proxy Connect Endpoint (Windows)	■ **Install**: Yes ■ **Uninstall**: No
Forcepoint Web Security Proxy Connect Endpoint (Mac)	■ **Install**: No, but an account sign out is required. ■ **Uninstall**: No
Forcepoint Web Security Direct Connect Endpoint (Windows)	■ **Install**: No ■ **Uninstall**: No
Forcepoint Web Security Direct Connect Endpoint (Mac)	■ **Install**: No, but an account sign out is required. ■ **Uninstall**: No
Forcepoint ECA (Windows)	■ **Install**: No ■ **Uninstall**: No

Upgrading Forcepoint F1E

For information about upgrading Forcepoint F1E, see the Upgrade Guide for Forcepoint F1E.

You do not need to uninstall earlier Forcepoint F1E versions before installing this version if you are upgrading from the following versions:

■ Forcepoint DLP Endpoint v22.06 or later

- Forcepoint Web Security Endpoint v22.06 or later
- Forcepoint ECA v22.06 or later

> **Note**
>
> - If your Forcepoint F1E version is earlier, Forcepoint recommends that you upgrade to one of the above versions before upgrading to this version, or uninstall the earlier version before you install this Forcepoint F1E version.
> - Only one type of Forcepoint Web Security Endpoint can be installed on an endpoint machine. Forcepoint Web Security Direct Connect Endpoint cannot be installed on an endpoint machine with Forcepoint Web Security Proxy Connect Endpoint installed.
> - If you currently have the Proxy Connect Endpoint installed, but want to install Direct Connect Endpoint (or vice versa), you must uninstall Proxy Connect Endpoint before installing Direct Connect Endpoint.
> - If you are upgrading from the conventional Forcepoint ECA (v1.4 or earlier) to this version of Forcepoint ECA, you must uninstall the conventional agent before installing this Forcepoint ECA version.

Restarting the endpoint machine after an upgrade

When you upgrade Forcepoint F1E agents on your endpoint machines, you might need to restart the endpoint machine to complete the upgrade. The following table shows the scenarios where a restart is required when you upgrade from an earlier version of the agent to this version.

Upgrade from	Restart Required?
Forcepoint DLP Endpoint (Windows)	
v22.06 or later	Yes
Forcepoint DLP Endpoint (Mac)	
v22.06 or later	No, But an account sign out is required.
Forcepoint Proxy Connect Endpoint (Windows)	
v22.06 or later	Yes
Forcepoint Proxy Connect Endpoint (Mac)	
v22.06 or later	No
Forcepoint Direct Connect Endpoint (Windows)	
v22.06 or later	Yes
Forcepoint Direct Connect Endpoint (Mac)	
v22.06 or later	No
Forcepoint ECA (Windows only)	
v22.06 or later	No

Using Forcepoint F1E

For information about using the Forcepoint F1E software, see End User's Guide for Forcepoint F1E.

Updating your Forcepoint DLP Endpoint message templates

If you use a custom message XML file, you need to add your custom XML file to your installation:

■ You can add the custom XML file to the package builder before you create your installation packages. For more information, see the Replacing the Message XML in the Forcepoint Endpoint All-in-One Package Builder Knowledge Base article.

■ You can install the custom XML file on the Forcepoint DLP server. For more information, see the "Install the new XML file" section in the Customizing Forcepoint DLP Endpoint client messages Knowledge Base article.

If you have deployed Forcepoint DLP Endpoint v19.06 or later and do not see the new messages for the confirmation dialog box (added in v19.06) or message 10010047 (added in v20.09), you might need to replace the default message template. For more information, see the Updating Confirmation Dialog message files in Forcepoint F1E Knowledge Base article.

Enabling full disk access on macOS

When you install or upgrade Forcepoint DLP Endpoint on an endpoint machine running macOS 13 (Ventura), macOS 14 (Sonoma), and macOS 15 (Sequoia), you must enable full disk access (FDA) for the following processes:

■ Library/Application Support/Websense Endpoint/DLP/ESDaemonBundle.app

■ Library/Application Support/Websense Endpoint/DLP/Websense Endpoint Helper.app

■ Library/Application Support/Websense Endpoint/DLP/wsdlpd

■ Library/Application Support/Websense Endpoint/EPClassifier/EndPointClassifier

If you are installing Forcepoint DLP Endpoint manually on an endpoint machine, the installation prompts you to enable FDA. See Deploying F1E DLP Endpoints on macOS Environments via Jamf Profile in *Forcepoint F1E Install Guide*.

Installing Forcepoint F1E agents and Neo together on an endpoint machine

If you are working with multiple agent installation, refer to the Forcepoint Agent Compatibility Knowledge Base article.

Resolved and known issues

This lists the resolved and known issues for the supported versions.

Known Issues

The list of known issues is available in the Known Issues Knowledge Base. You must sign into My Account to view the list. To create a customer account, navigate to the Customer Hub Home page, and then click the **Create Account** link.

Resolved Issues for v26.02

Issue	Component	Description
UEP-92485	Forcepoint DLP Endpoint (Windows)	Installation: Resolved an issue that was causing agent installs on Windows 11 25h2 to fail and result in a partial install only.
UEP-92468	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Policy Enforcement: Resolved an issue where the default action for timeout on a coaching dialog was not always applied.
UEP-92464	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: Fixed an issue preventing users from printing on a limited number of internal web pages
UEP-92404	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Incident reporting: Resolved an issue where an empty domain list for online apps (excluding ext & web domains for MV3) was leading to a large number of false positive incidents for Firefox.
UEP-92289	Forcepoint DLP Endpoint (macOS and Windows)	Incident reporting: Resolved an issue where emails sent from the Outlook client to a group distribution were reporting the "To" field as "N/A" in the FSM DLP incident forensic.
UEP-92137	Forcepoint DLP Endpoint (macOS and Windows)	Policy Enforcement: Resolved an issue where the "PrtScn" button could be used to print the contents of the screen, even when an application was active that should have prevented the "PrtScn" action from capturing the screen contents. Preventing other methods of screen capture is a feature to plan to add to the agent in the future.

Issue	Component	Description
UEP-92085	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Uninstall: Resolved an issue where the ForcepointExtensions application remained after uninstall.
UEP-92043	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Uninstall: Resolved an issue where the Firefox browser extension was not removed after an upgrade followed by an uninstall.
UEP-92030	Forcepoint DLP Endpoint (Windows)	Stability: Resolved an issue with F1E PCEP installs on Windows that could lead to a BSOD error in very limited circumstances.
UEP-91942	Forcepoint DLP Endpoint (Windows)	Stability: Resolved an issue on Windows with DLP installs where an Excel file corruption occurred when working with the file in a Google Drive shared folder(s).
UEP-91768	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Policy Enforcement: Resolved an issue where files dragged directly from a ZIP to the web browser were not scanned.
UEP-91743	Forcepoint DLP Endpoint (Windows)	Usability: Resolved a duplicate confirm pop-up with F1E DLP, which occurred when a user dragged and dropped a file into the Teams application.
UEP-91739	Forcepoint DLP Endpoint (macOS)	Resolved an issue where the `fpnpd` inline proxy process on macOS endpoints would start automatically despite being disabled in the endpoint profile.
UEP-91557	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Policy Enforcement: Resolved a potential data leak on WhatsApp web when a user performs a re-try on an initially blocked message. **Note** in addition to this fix, you can also view *here* for how to best protect data leaks on apps that auto-save data.

Issue	Component	Description
UEP-90283	Forcepoint DLP Endpoint (macOS and Windows)	Agent User Details: Resolved an issue that meant the child domain for a user was getting reported instead of the correct root domain, which resulted in the user not getting the correct group-based inclusions/exclusions applied for the Next-Generation Firewall rules.
UEP-90280	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: Resolved an issue caused by the MV3 browser extension on certain internal applications, which prevented the print preview page from showing and hence prevented the printing function.
UEP-84160	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Policy Enforcement: Resolved an issue preventing DLP policy from being applied to text entered into Claude AI in the web browser.

Resolved Issues for v25.11

Issue	Component	Description
UEP-91851	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: Fixed an issue that impacts browsing experience when the agent is not functional.
UEP-91846	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue where right-click copy/paste data from Excel to browser was not detected by the MV3 extension, while keyboard shortcuts worked as expected.
UEP-91842	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: The 'Refresh page' button on block banner is removed. This is required to maintain browser compatiblity.
UEP-91825	Forcepoint DLP Endpoint (Windows)- Manifest V3 Browser Extension	Agent Stability: Resolved an issue where wepsvc crashed while browsing when browser extension bypass list was configured via FSM
UEP-91763	Forcepoint DLP Endpoint (Windows)	Application Stability: Resolved an issue where Microsoft Teams crashed intermittently when being monitored for file access.

Issue	Component	Description
UEP-91583	Forcepoint DLP Endpoint (macOS)	Agent Stability: Resolved an issue where Forcepoint endpoint applications on Mac OS could be deleted without disabling protection. These apps are now covered under anti-tampering controls.
UEP-91582	Forcepoint DLP Endpoint (macOS)	Usability: Resolved an issue where messages sent from shared mailboxes in Outlook for Mac 16.101 were stuck in Drafts.
UEP-91501	Forcepoint DLP Endpoint (macOS and Windows)	Policy Enforcement: Resolved an issue in Windows OS where USB device names containing control characters caused USB device exclusion policy to not work
UEP-90551	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Uninstallation: Resolved an issue in 25.11 where uninstalling the endpoint could be incomplete on systems upgraded from versions earlier than 24.06, leaving browser extensions installed.
UEP-90415	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: Resolved an issue related to printing from a browser via a pop-up window for specific custom web applications
UEP-90390	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Usability: Resolved an issue where export to PDF operations triggered by the extension caused failures in Google Sheets
UEP-90354	Forcepoint DLP Endpoint (macOS)	Upgrade Support: Fixed a PCEP upgrade issue on Mac OS where the agent does not start after upgrading PCEP from 24.11 to newer versions.
UEP-86607	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension	Policy Enforcement: Resolved an issue where sensitive email attachments from Outlook client could be dragged and dropped to websites without detection; uploads are now correctly blocked.

Resolved Issues for v25.09

Issue	Component	Description
UEP-91020	Forcepoint Endpoint Context Agent (Windows)	Agent Stability: Resolved an issue discovered in version 25.06 where the Endpoint Context Agent (ECA) capability was not loading after install.
UEP-90550	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue on Chrome and Edge where a file could be leaked to Telegram using drag and drop. A solution is in progress for Safari and Firefox, where the issue is still present.
UEP-90266	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Usability: Resolved an issue where the usability of some sites that interface with bar-code scanners was impacted e.g. application log outs or page refreshes when an item was scanned.
UEP-90251	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	DLP Policy Enforcement: Content entered and submitted via the enter key immediately is not scanned for DLP policy violations. There will be a KBA on how best to protect against this scenario published soon, while we work on a solution.
UEP-90151	Forcepoint DLP Endpoint (macOS and Windows)	DLP Policy Enforcement Usability: When a file is dragged and dropped into any folder on the SharePoint site and it results in a block action and the user clicks the "Retry" button (instead of the "Refresh Page" button from the banner), the website enters offline mode. The browser reload does not restore functionality; the page remains unresponsive. The issue is resolved now.
UEP-90133	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Incident reporting: Resolved an issue where read-only content was being scanned which could result in a policy triggering and an incident getting reported in the FSM.
UEP-90117	Forcepoint DLP Endpoint (macOS and Windows)	Endpoint Usability: Drag-and-drop behaviour on Firefox and Safari is not yet fully supported. Future F1E releases will bring drag-and-drop support in line with the Chrome and Edge browsers.

Issue	Component	Description
UEP-90116	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Usability: Resolved an issue with the MV3 extension file input DOM manipulation, that was interfering with some enterprise web applications.
UEP-89585	Forcepoint DLP Endpoint (macOS and Windows)	Usability: Resolved an issue where users were encountering TLS validation error "local: no active user session for cert validation" when using inline proxy mode.
UEP-88397	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue with Chrome and Edge, where content could be leaked on ChatGPT when users enter text and immediately submit it. A solution is in progress for Safari and Firefox, where the issue is still present.
UEP-87699	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Usability: Resolved an issue on OWA where no suggestions were displayed when searching for users in the search bar.
UEP-86613	Forcepoint DLP Endpoint (macOS and Windows)	Policy Enforcement: Resolved an issue with F1E DLP in inline proxy mode - where traffic was not routed via the transparent proxy and hence no detection was happening.
UEP-86515	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue with Chrome and Edge where on some websites e.g sendfileonline, digiboxx, the file with sensitive content was getting uploaded successfully even though the blocked banner was displayed. A solution is in progress for Safari and Firefox, where the issue is still present.
UEP-85700	Forcepoint Endpoint Context Agent (Windows)	Stability: Resolved an intermittent BSOD issue on Windows 11 24H2 for ECA endpoints observed since 25.03.
UEP-85256	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Incident reporting: Resolved an issue where the destination value was displayed in the DLP incident as "ABOUT:BLANK" for incidents created in Outlook Web.

Resolved Issues for v25.08

Issue	Component	Description
UEP-89606	Forcepoint DLP Endpoint (macOS and Windows)- Manifest V3 Browser Extension Issues	Endpoint usability: Resolved an issue that was causing users to have to press the enter key twice for search results to show on some SharePoint and Jira web applications. **Note** This issue is resolved in 25.08 but is still present in the previous 25.07 F1E release.

Resolved Issues for v25.07

Issue	Component	Description
UEP-86512	Forcepoint DLP Endpoint (Windows)	Endpoint Stability: Resolved the BSOD issues with F1E DLP on Windows ARM devices.
UEP-86610	Forcepoint DLP Endpoint (macOS)- Manifest V3 Browser Extension Issues	Endpoint Usability: Resolved an issue that was preventing the copying and pasting of an image from a doc file to some sites in the browser.
UEP-86698	Forcepoint DLP Endpoint (Windows and macOS)	Endpoint Usability: Fixed an issue that was preventing users from sending emails in Gmail after they had attempted to send the email that violated a DLP policy, but subsequently removed the violation content.
UEP-86694	Forcepoint DLP Endpoint (Windows and macOS)	Resolved an issue where non-sensitive files were not uploaded during multi-file uploads if any sensitive file was detected.
UEP-87775	Forcepoint DLP Endpoint (macOS)- Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue that was causing content that was copied and pasted via mouse click from a text file into the browser to not be analyzed for DLP policy violation.

Issue	Component	Description
UEP-87994	Forcepoint DLP Endpoint (Windows and macOS)- Manifest V3 Browser Extension Issues	Endpoint Usability: Resolved an issue where users were unable to paste images into a specific website when Manifest V3 (MV3) was enabled.
UEP-88050	Forcepoint DLP Endpoint (Windows and macOS)- Manifest V3 Browser Extension Issues	Endpoint Stability: Resolved an issue with MV3, where re-trying to connect errors messages would appear when using Gmail.

Resolved Issues for v25.06.5725

Issue	Component	Description
UEP-88413	Forcepoint DLP Endpoint (Windows)	Agent Stability: Agent process (`wepsvc`) crashes observed on Windows with the 25.06 agent version when using Teams, Outlook and Web browsing. This is now fixed.

Resolved Issues for v25.06

Issue	Component	Description
UEP-72323	Forcepoint DLP Endpoint (Windows)	Incident reporting: Fixed an issue where the file path reported for a removable media incident was not correct.
UEP-85028	Forcepoint DLP Endpoint (Windows)	Stability: Fixed a crash that could occur with Classic Outlook on Windows when an email msg file contained a static map image.
UEP-85201	Forcepoint DLP Endpoint (Windows) - Manifest V3 Browser Extension Issues	Policy Enforcement: Resolved an issue that meant DLP policy enforcement was not occurring on Rediffmail and Yahoo mail.
UEP-85205	Forcepoint DLP Endpoint (Windows and macOS)- Manifest V3 Browser Extension Issues	Usability: With the MV3 extension running, Gmail frequently displays "re-trying connection" messages.
UEP-85262	Forcepoint DLP Endpoint (macOS)	Endpoint Functionality: Resolved an issue on macOS, where the FPNPD process stopped and was not getting started.

Issue	Component	Description
UEP-85284	Forcepoint DLP Endpoint (macOS)- Manifest V3 Browser Extension Issues	Resolved an issue on macOS Sonoma, where the browser extension on Safari did not load after an install.
UEP-85679	Forcepoint DLP Endpoint (macOS)	Incident reporting: Resolved an issue where the forensic file included in the incident in the FSM for the print channel violation on macOS would not open.
UEP-85808	Forcepoint DLP Endpoint (Windows and macOS) - Manifest V3 Browser Extension Issues	Usability: Resolved an issue where sites required multiple presses of the enter key when trying to submit content or move to a new line e.g. DuckDuckGo searches, MFA one-time password sites, Signal chat messages send and Outlook Web when creating a new line on an email.
UEP-86250	Forcepoint DLP Endpoint (Windows)	Stability: Resolved an issue where if the bypass protection from the Forcepoint DLP endpoint is enabled for a limited time after using the bypass code from the FSM, the endpoint crashes when some transactions occur.
UEP-86332	Forcepoint DLP Endpoint (macOS) - Manifest V3 Browser Extension Issues	Stability: Resolved an issue where the package builder option to not add the Firefox or Chrome extensions was not working, which resulted in the extensions getting added on macOS when they should not be.
UEP-86373	Forcepoint DLP Endpoint (Windows and macOS)	Detection: Resolved an issue where files uploaded from a mapped network were not getting detected in certain scenarios.
UEP-86614	Forcepoint DLP Endpoint (Windows and macOS) - Manifest V3 Browser Extension Issues	Usability: Resolved an issue on an (One Time Passcode (OTP) site where the cursor was moving back to the previous input box after the user entered the character.

Resolved Issues for v25.05

Issue	Component	Description
UEP-84100	Forcepoint DLP Endpoint (macOS)	Resolved an issue on macOS for F1E Web, where users incorrectly got authentication prompts from WCG when the machine is on-premises.
UEP-84126	Forcepoint DLP Endpoint (macOS)	Resolved an issue on macOS for F1E DLP installs configured to run in browser extension mode, that can cause the fpnpd process to run when it should not.
UEP-84435	Forcepoint DLP Endpoint (macOS or Windows)	Usability: Resolved an issue for many sites where Users had to press the Enter key twice to switch to a new line
UEP-85269	Forcepoint Web Security Endpoint (Windows) - PCEP	Resolved an intermittent BSOD issue on Windows 11 24H2 for PCEP endpoints for Cloud Web Security.
UEP-85307	Forcepoint DLP Endpoint (Windows)	Resolved an issue where content is not blocked in the case where the numpad enter is used to submit content.
UEP-85694	Forcepoint DLP Endpoint (macOS)	Resolved an intermittent issue where F1E PCEP on macOS could stay in fallback mode after the device came out of sleep mode.

Resolved Issues for v25.04

Forcepoint DLP Endpoint (Windows)	UEP-85233	Endpoint usability: Fixed a conflict that occurred with certain third party Excel plugins and our agent, which resulted in an error message when copying/pasting data between Office apps.
	UEP-84844	Endpoint Usability: Resolved an issue preventing users from downloading files from Google Drive.
	UEP-84368	Resolved an issue where older browser extension versions sometimes remained after an agent upgrade or uninstall.

	UEP-83373	Resolved an issue where the decryption utility was copied to the USB upon a USB encrypt policy action, which occurred in itself, was encrypted. Now, the decryption utility is copied unencrypted.
	UEP-83363	Reduced the number of duplicate end user popups and incidents that are created when monitoring clipboard events for MSTSC.
	UEP-83195	Updated the agent to only modify F1E product-specific entries in the registry key for Citrix, other values in the key are left untouched.
	UEP-82300	Resolved an issue that caused Excel to crash on Windows ARM devices.
	UEP-82998	Resolved an issue that sometimes resulted in the inline proxy not performing SSL decryption after a reboot.
	UEP-80938	Resolved an issue that resulted in the system tray icon not appearing sometimes when RDS is disabled on the device.
	UEP-80020	Resolved an issue where a file triggered a confirm pop-up, and the file upload was blocked despite the user selecting to allow. This issue only occurred intermittently, but it is now resolved.
	UEP-79624	Endpoint Functionality: Resolved an issue that was causing Outlook to crash in certain cases with a large number of recipients in the To field, e.g, over 500.
	UEP-76975	Incident reporting: With this agent version, incidents reported in the FSM for CD ROM devices on the removable media channel will display the correct serial number as part of the destination value.
	UEP-76304	Incident reporting: With this agent version, incidents reported in the FSM for removable media channel will display the combined serial number and PNP device ID as part of the destination value.

Forcepoint DLP Endpoint (macOS)	UEP-81574	Resolved an issue where Safari extensions were failing to load on macOS 15 Sequoia, when a custom logo for the coaching dialog was used.
	UEP-80936	Resolved a process crash that was preventing the application of DLP policy to files that were copied to a USB on macOS.
	UEP-80913	Resolved an issue on macOS that was causing the Adobe InDesign App to freeze when a file was open from a network location and renamed.
	UEP-84251	Resolved an issue that was causing authentication prompts for a "blackspider" URL to appear for F1E DLP standalone installations.
Forcepoint DLP Endpoint (Windows and Mac)	UEP-84845	Resolved an issue that prevented the DLP policy from being applied to Microsoft Onedrive Web.
	UEP-84753	Endpoint usability: Fixed an issue preventing the copying and pasting of the content into the Chrome and Edge browsers from some applications such as Excel and PowerPoint.
Forcepoint Web Security Endpoint (Windows)	UEP-82013	Endpoint Compatibility: Resolved an issue where the F1E DCEP agent would prevent VPN clients that use UDP port 443 from connecting. With this version, you can now bypass the necessary process so that F1E DCEP does not block the client from connecting. For more details, refer F1E DCEP default block of UDP port 443 in version 25.03.
Forcepoint Web Security Endpoint (macOS)		No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.
Forcepoint Endpoint Context Agent (Windows)		No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.
Forcepoint One Endpoint package builder		No issues were resolved in this release of Forcepoint One Endpoint package builder.

Resolved Issues for v25.03

Forcepoint DLP Endpoint (macOS) - Manifest V3 Browser Extension Issues	UEP-82459	Resolved an issue where files were not uploaded after a drag-and-drop action in Firefox.
Forcepoint DLP Endpoint (Windows) - Manifest V3 Browser Extension Issues	UEP-84465	End user behavior impact: Resolved an issue that prevented users from creating a new document in Google Workspace.
Forcepoint DLP Endpoint (macOS and Windows) - Manifest V3 Browser Extension Issues	UEP-84480	End user behavior impact: Resolved an issue preventing users from navigating to certain sites. For example: okta.com, portal.oeconnection.com, console.firebase.google.com, atlassian.net, teams.microsoft.com.
	UEP-84371	End user behavior impact: Resolved an issue in the browser extension that was preventing the pasting of images into sites on Chrome, Edge and Safari. The problem still exists with the Firefox browser.
Forcepoint DLP Endpoint (Windows)		No issues were resolved in this release of Forcepoint DLP Endpoint for Windows machines.
Forcepoint DLP Endpoint (macOS)		No issues were resolved in this release of Forcepoint DLP Endpoint for Mac machines.
Forcepoint DLP Endpoint (Windows and Mac)		No issues were resolved in this release of Forcepoint DLP Endpoint for Windows and Mac machines.
Forcepoint Web Security Endpoint (Windows)	UEP-82706	Resolved a Blue Screen of Death (BSOD) issue in PCEP observed with Windows 11 24H2.
Forcepoint Web Security Endpoint (macOS)		No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.
Forcepoint Endpoint Context Agent (Windows)		No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.
Forcepoint One Endpoint package builder		No issues were resolved in this release of Forcepoint One Endpoint package builder.

Resolved Issues for v25.02

Forcepoint DLP Endpoint (Windows)	No issues were resolved in this release of Forcepoint DLP Endpoint for Windows machines.
Forcepoint DLP Endpoint (Mac)	No issues were resolved in this release of Forcepoint DLP Endpoint for Mac machines.
Forcepoint DLP Endpoint (Windows and Mac)	No issues were resolved in this release of Forcepoint DLP Endpoint for Windows and Mac machines.
Forcepoint Web Security Endpoint (Windows)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Windows machines.
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.
Forcepoint Endpoint Context Agent (Windows)	No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.
Forcepoint One Endpoint package builder	No issues were resolved in this release of Forcepoint One Endpoint package builder.

Resolved Issues for v24.11

Forcepoint DLP Endpoint (Windows)	UEP-76876	Fixed an issue with the inline proxy that was preventing WhatsApp web page loading on some systems.
	UEP-74863	Resolved an issue where multiple incidents were created on performing permit action in websites.
	UEP-78903	Resolved a scenario where a BSOD could occur when a file is moved to a USB and encrypted using a profile key on one device and edited on a different device with a permit (audit) action is triggered.
	UEP-75711	Resolved an issue where the inline proxy would not start correctly if the agent was installed in a custom location.
	UEP-78882	Resolved an issue where files were sometimes not blocked if they were stored in a folder with a long source path.
Forcepoint DLP Endpoint (Mac)	No issues were resolved in this release of Forcepoint DLP Endpoint for Mac machines.	

Forcepoint DLP Endpoint (Windows and Mac)	No issues were resolved in this release of Forcepoint DLP Endpoint for Windows and Mac machines.	
Forcepoint Web Security Endpoint (Windows)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Windows machines.	
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.	
Forcepoint Endpoint Context Agent (Windows)	No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.

Resolved Issues for v24.07

Forcepoint DLP Endpoint (Windows)	UEP-76945	Resolved an issue where sites that were added to the JavaScript injection bypass list were not loading correctly.
	UEP-76097	Now, the Firefox Proxy and PAC settings are no longer locked.
	UEP-75822	Resolved an issue where `fpneonetworksvc.exe` crashed.
	UEP-77155	Resolved an issue where the agent was setting a registry value for Chrome that caused other Chrome extension to be unloaded in certain circumstances.
	UEP-76876	Resolved an issue with the inline proxy that was preventing WhatsApp web page loading on some systems.
	UEP-76914	Resolved an issue where users could uninstall the agent without providing the anti-tampering password.
	UEP-76447	Resolved an issue where the F1E endpoint icon disappeared from the system tray after the first shutdown when RDP Services were not running.

	UEP-77146	Resolved an issue where Outlook crashed in F1E 24.04 when sending email to a distribution list with hidden recipients.
	UEP-76886	Now, F1E DLP blocks the data pasted in the DingTalk application.
	UEP-76274	Resolved an issue where users with DLP endpoint on Windows machines experienced Blue Screen of Death (BSOD) errors due to `cwnep.sys`.
	UEP-78059	Resolved an issue where a lot of `.tmp.QIPT` and `.tmp.WEFS` were getting accumulated in the endpoint machine at `C:\Windows\Temp` and these were not getting deleted automatically.
	UEP-76287	Now, the URLs load correctly.
	UEP-75817	Resolved an issue where customers encountered Secure/ Multipurpose internet Mail Extensions (S/MIME) error in outlook when replying to an existing conversation.
	UEP-76069	Now, Google and Bing searches on the address bar loads after installing F1E 23.11 endpoint with Inline proxy.
	UEP-76482	Resolved an issue where Blue Screen of Death (BSOD) errors occurred due to WsNetFlt.sys with the 23.04 endpoint, potentially caused by a conflict with a third-party application.
	UEP-80966	Resolved the issue by removing the versions of 7-zip libraries included with the agent that were found to be vulnerable.
Forcepoint DLP Endpoint (Mac)	UEP-76407	Resolved an issue where the Firefox PAC setting got locked on MacOS in browser extension mode.
	UEP-76313	Resolved an issue where the default domain configured in the Endpoint package was not getting applied after installation.
	UEP-76332	Resolved an issue where applications were hanging and not launching in the MAC machines.

Forcepoint DLP Endpoint (Windows and Mac)	No issues were resolved in this release of Forcepoint DLP Endpoint for Windows and Mac machines.	
Forcepoint Web Security Endpoint (Windows)	UEP-75529	Resolved an issue where Firefox was not opening in DLP+DCEP mode.
	UEP-76482	Resolved an issue where users with PCEP 23.04 endpoint on Windows machines experienced Blue Screen of Death (BSOD) errors due to `WsNetFlt.sys`.
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.	
Forcepoint Endpoint Context Agent (Windows)	UEP-77262	The updated `ssleca` lib files for Windows 32 and Windows x64 are now bundled with F1E.
Forcepoint One Endpoint package builder	No issues were resolved in this release of Forcepoint One Endpoint package builder.	

Resolved Issues for v24.04

Forcepoint DLP Endpoint (Windows)	UEP-76064	Resolved an issue where the memory usage of `fpneonetworksvc.exe` increased excessively during web file uploads, leading to machine crashes.
	UEP-75815	Resolved an issue where multiple problems occurred when a user copied the `MSTSC.exe` file from the desktop to another server or machine's RDP.
	UEP-75101	Microsoft Edge now loads after the machine with DLP endpoint installed comes out of sleep mode.
	UEP-75383	Resolved an issue where multiple incidents were created on performing permit action, and confirming pop up text in JSInjected websites.
	UEP-74802	Resolved an issue where pasting more than ten keywords into WebEx Chat created multiple duplicate incidents.

	UEP-75822	Resolved the `fpneonetworksvc.exe` crash issue.
	UEP - 76027	User can now open the DLP notification mail as the attachment appears in correct format.
	UEP-75107	Users can now open multiple PDF files from a network path with a long path.
	UEP-75992	When the endpoint is set to monitor mode, the Confirm dialog no longer appears, allowing the transaction.
	UEP-75484	After uninstalling F1E DLP, the Websense Endpoint folder is no longer left behind.
	UEP-75118	F1E User Interface now supports High Contrast mode.
	UEP-74863	Resolved an issue where multiple incidents were created on performing permit action in websites.
	UEP-75041	Resolved an issue where `Wepsvc.exe` crashed in every few minutes.
	UEP-76914	Resolved an issue where users could uninstall the agent without providing the anti-tampering password.
	UEP-74547	Resolved an issue where Endpoint printing was mixing up files between users in a VDI environment.
	UEP-75046	Resolved an issue where the software was unable to analyze the content of attached emails. This limitation occurs because, while regular file attachments are processed as expected, attached emails (including binary .msg files) cannot currently be analysed by the software.
	UEP-74014, UEP-74073, UEP-74940	Resolved an issue where BSOD occurred due to `Cwnep.sys` with 22.12 endpoint.
Forcepoint DLP Endpoint (Mac)	UEP-75696	Resolved an issue where USB device storage exceptions were not functioning as expected on MAC.

	UEP-75681	Now, the Forcepoint log folder is not left behind after uninstallation.
	UEP-73274	`web.telegram.org/k` has been now added to the JavaScipt injection exclude list so that file upload is not blocked.
Forcepoint Web Security Endpoint (Windows)	UEP-75986	Resolved an issue where users with PCEP 23.10 endpoint on Windows machines experienced Blue Screen of Death (BSOD) errors.
	UEP-76291	Resolved an issue where Firefox took several minutes to launch with F1E DCEP running.
	UEP-75529	Resolved an issue where Firefox was not opening in DLP+DCEP mode.
	UEP-72553	Resolved an issue where, when IPv6 was enabled, requests to authenticate for VSCode client build compilation failed 1 out of 10 times.
	UEP-75108	Resolved an issue where internet was not working with F1E PCEP for hybrid customer tenant.
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.	
Forcepoint Endpoint Context Agent (Windows)	No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.	
Forcepoint One Endpoint package builder	No issues were resolved in this release of Forcepoint One Endpoint package builder.	

Resolved Issues for v23.11

Forcepoint DLP Endpoint (Windows)	UEP-74998	File contents of ZIP/PPTX data type are now getting detected with the v23.04 agent over the Endpoint Email channel.
	UEP-74549	Resolved an issue where the DLP Endpoint Email channel failed to detect any excel file whose size exceeded 1 MB.

	UEP-73642	The `Dserui.exe` and `ProxyUI.exe` processes of `F1EUI.exe` are now being protected by antitampering.
	UEP-74616, UEP-74496	Resolved an issue where the Confirmation Coaching Dialog box did not include any missing violated content whenever the user upgraded from v22.12 to v23.04.
	UEP-73314	The session number on Azure Virtual Desktop now reflects the correct value of active azure desktop users who logged in.
	UEP-74672	Resolved an issue where the NEP advanced exclusions stopped working in v23.04.
	UEP-74799	Resolved an issue where after installing F1E DLP and restarting machine, the event logs displayed few services crashing and restarting.
	UEP-74715	When a user upgrades to v23.04, the `Wepsvc.exe` file of Enabling Endpoint Bypass feature no longer crashes.
	UEP-74986	Resolved an issue where the web traffic gets blocked when the user installs F1E DLP v23.04 and enables inline proxy mode.
	UEP-74876	When Remote Desktop Services is disabled on Windows 11, the endpoint no longer causes performance issues with certain applications and the tray icon no longer disappears.
	UEP-75041	Resolved an issue where the `wepsvc.exe` file kept on crashing every few minutes after the user upgraded to Endpoint v23.04
	UEP-74717	Forcepoint F1E Inline Proxy no longer removes Window's proxy setting script after the service restarts and waits to get its correct configuration from the Forcepoint Security Manager (FSM).
	UEP-73489	Removed the support of 32-bit installer creation using the package builder, since it's no longer supported.

	UEP-74548	SSL bypass list character limit on the Endpoint is now fixed.
	UEP-74997	The PDF printing feature from Chrome browser now blocks all sensitive text when in Inline Proxy mode.
	UEP-75117	Resolved an issue where cut, copy and paste actions were not detected and blocked in Firefox browser.
	UEP-75110	The BSOD error no longer appears after installing the Endpoint Agent while running with Policy PAK software.
	UEP-74718	Resolved an issue where Endpoint LAN exclusions were not working as expected in v23.04.
Forcepoint DLP Endpoint (Mac)	UEP-74667, UEP-74669	Apple Mail Plugin is now compatible with macOS Ventura 13.4 (M1).
	UEP-75023	Resolved an issue where the Apple Mail Plugin was non compatible with macOS Ventura 13.5.
	UEP-74395	EPC and DLP no longer crashes on macOS 13.1 Ventura.
	UEP-74878	Resolved an issue where the internet access got blocked after installing Mac Endpoint Client IB v23.04.
	UEP-74383	Resolved an issue where the macOS network extension for Inline Proxy did not redirect to local host, by adding support for Zscalar compatibility.
	UEP-73290	Incidents on Mac Safari are now getting reported for the sensitive key phrases in the message body of Gmail.
	UEP-75272	Resolved an issue where some apps were not launching from Finder/Dock after a prolonged period of time.
	UEP-74877	F1E DLP 23.04 enables inline proxy if endpoint is disconnected when rebooting after install. This issue is fixed now.

	UEP-74978	Resolved an issue where hooking on email, network and removable media channels was not working as expected on customer environment except with Safari.
Forcepoint Web Security Endpoint (Windows)	UEP-74325	Resolved an issue where the F1E DCEP experienced intermittent service crashes, by improving memory mapping in DCEP.
	UEP-73428	Resolved an issue where users were unable to log into Citrix while connected to VPN with F1E DCEP 22.10 in an IPv6 environment.
	UEP-75103	Accented characters are now getting detected via extension in Firefox browser.
	UEP-72553	Resolved an issue where when enabling IPv6, requests to authenticate for VSCode client build compilation failed 1 out of 10 times.
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.	
Forcepoint Endpoint Context Agent (Windows)	No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.	
Forcepoint CASB Endpoint (Windows)	No issues were resolved in this release of Forcepoint CASB Endpoint for Windows machines.	
Forcepoint One Endpoint package builder	No issues were resolved in this release of Forcepoint One Endpoint package builder.	

Resolved Issues for v23.04

Forcepoint DLP Endpoint (Windows)	UEP-71230	Windows DLP Contained files stored in %TEMP% are now automatically deleted.
	UEP-72222	EP Email doesn't get blocked anymore when the sensitive content is removed from the email.
	UEP-71592	File now gets scanned whenever it gets accessed via a modal dialog.

	UEP-73431	Product Code in setup.ini now matches with the product code present on the Endpoint.
	UEP-73560	`DLPOfficeAddin.xml` gets correctly validated now when it is uploaded to O365.
	UEP-72854	Customer custom application is now working when DLP Agent is installed, and Anti Tampering is enabled.
	UEP-72356	When a file gets encrypted on USB and is deleted, it no longer gets saved in USB Drive Recycle bin in plain text.
	UEP-72369	Serial number now gets reported correctly for SanDisk Extreme USM mass storage device.
	UEP-72323	Source file path details are now reported correctly in the incident for removable media channel.
Forcepoint DLP Endpoint (Mac)	UEP-73005	User interaction is no longer required for uninstalling Forcepoint Neo NE App.
Forcepoint Web Security Endpoint (Windows)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Windows machines.	
Forcepoint Web Security Endpoint (Mac)	No issues were resolved in this release of Forcepoint Web Security Endpoint for Mac machines.	
Forcepoint Endpoint Context Agent (Windows)	No issues were resolved in this release of Forcepoint Endpoint Context Agent for Windows machines.	
Forcepoint CASB Endpoint (Windows)	No issues were resolved in this release of Forcepoint CASB Endpoint for Windows machines.	
Forcepoint One Endpoint package builder	No issues were resolved in this release of Forcepoint One Endpoint package builder.
