

Forcepoint DLP

10.4.4

Maintenance Release Notes

Maintenance Release Notes

Overview

Attention

The 10.4.4 version is a maintenance release for Forcepoint Management Infrastructure only.

The maintenance releases address key fixes and improvements aimed at enhancing the security and stability of our product.

This document provides information on the Forcepoint DLP Maintenance packages for:

- Forcepoint DLP Maintenance Release 10.4.x
- Forcepoint Management Infrastructure Maintenance Release 10.4.x

Note

The 10.4.4 version includes only Forcepoint Management Infrastructure Maintenance Release 10.4.4 Installer.

Note

Forcepoint DLP 10.4.x maintenance package is the maintenance release for the DLP Security Manager, and not for Secondary/Supplemental DLP Servers.

New in Forcepoint Security Manager

The PostgreSQL version upgrade

This release upgrades PostgreSQL to version 18.6. Uninstalling the Forcepoint Management Infrastructure Maintenance Release reverts PostgreSQL to version 18.4.

Note

After uninstalling the Forcepoint Management Infrastructure 10.4.4 Maintenance Release, avoid running **Modify** from the Forcepoint Management Infrastructure 10.4 release setup, as this will cause incompatibility issues with the upgraded PostgreSQL component.

Should that happen, functionality may be affected until the component is reconfigured. Refer to [Error Handling](#) in the Install Guide for reconfiguration instructions.

Forcepoint DLP and Forcepoint Management Infrastructure Maintenance Releases 10.4.x

Attention

The 10.4.4 version is a maintenance release for Forcepoint Management Infrastructure only.

Following package files are available in the 10.4.x maintenance release:

- Forcepoint DLP Maintenance Release Installer (`dlp_v10_4_x_maintenance_release.exe`) - Includes fixes for a specific Forcepoint DLP version
- Forcepoint Management Infrastructure Maintenance Release Installer (`fsm_v10_4_x_maintenance_release.exe`) - Includes fixes for the Forcepoint Security Manager's global setting interface

Note

The 10.4.4 version includes only Forcepoint Management Infrastructure Maintenance Release 10.4.4 Installer.

Note

The maintenance installers can be run on top of the corresponding Forcepoint DLP version.

- For information on installing the maintenance release, see [Forcepoint DLP Install guide v10.4](#).
- For information on the maintenance upgrade, see [Forcepoint DLP Upgrade guide v10.4](#).

System Requirements

Lists the system requirements that must be met for the maintenance release.

- Forcepoint DLP version 10.4.
- Forcepoint Management Infrastructure version 10.4.

List of fixes that are part of this Maintenance package

The maintenance package contains a set of fixes to bugs and issues.

Fixes included in this version of the maintenance

Issue ID	Component	Category	Description
FSM-552	Forcepoint Management Infrastructure	Defect	Upgraded PostgreSQL to version 18.6 to remediate a heap buffer overflow vulnerability.

For fixes included in previous 10.4.x releases, see the following:

- [List of fixes in Forcepoint DLP v10.4.3](#)
- [List of fixes in Forcepoint DLP v10.4.2](#)
- [Resolved and Known Issues in Forcepoint DLP v10.4.0](#)
