About this release

This document contains important information about the current release. We strongly recommend that you read the entire document.

Forcepoint VPN Client is an end-user component for use with Forcepoint Next Generation Firewall (Forcepoint NGFW). The Forcepoint VPN Client provides a secure remote connection to your organization's network. Strong encryption prevents eavesdropping and modification of the traffic. The Forcepoint VPN Client provides easy and secure remote access to private networks where Forcepoint NGFW is used as a VPN gateway.

System requirements

The Forcepoint VPN Client is compatible with several Microsoft Windows operating systems and needs a specific software environment.

- Operating systems:
 - Windows 10 (x64)
 - Windows 11 (x64)
- Microsoft.NET Framework 4.5

Build number and checksums

The build number for Forcepoint VPN Client 6.11.1 is 0167.

Use the checksums to make sure that the installation files downloaded correctly.

- Forcepoint-VPN-Client-6.11.1.0167.exe
