About this release

This document contains important information about Hotfix 1 for version 7.4.2 of the Forcepoint Network Security Platform Security Engine.

We strongly recommend that you upgrade to this Hotfix release only if it contains fixes for issues that impact your environment. We also recommend that you upgrade to the next official Forcepoint Network Security Platform Security Engine maintenance release as soon as it becomes available.

Build number and checksums

The build number for this release is 32153.hotfix.1.

Use the checksums to make sure that the installation files downloaded correctly.

- `sg_engine_7.4.2.32153.hotfix.1_x86-64-small.zip`
