SUMMARY2
NEW FEATURES2
BUG-FIXES.....2

Summary

Agent 3.2.0 includes several exciting new features and enhancements, as well as bug fixes. The main highlight of this release is the five new languages that we have started to support. We have also added the option where Admin can select which languages are displayed in the Agent Configuration settings so that agents can only select from the languages that are relevant to their business needs. This release also includes several bug fixes, ensuring that Agent 3.2.0 is more stable and reliable than ever before.

Upgrade to Agent 3.2.0 today to take advantage of these new features and enhancements, and to experience a better, more efficient workflow.

New Features

New Language added for Agent UI and Selecting Agent Language on the Language Setting page of dashboard.

- Hebrew
- Polish
- Thai
- Chinese
- Spanish

Additional Alert when sending email

Using this feature user can display an additional alert window to the user based on the classification value.

```
"policyAlertConfiguration": {  
  "classificationValue": "Public",  
  "alertMessage": "Please review the classification"  
},
```
