Forcepoint Data Classification Agent

3.4.0

Release Notes

Table of Contents

Summary

Agent 3.4.0 includes several exciting new features and enhancements, as well as bug fixes. In this release we also did a major revamp in the header footer for PowerPoint plugin, now the visual labels are not editable, and users will be asked where they want to apply visual labels. This release also includes several bug fixes, ensuring that Agent 3.4.0 is more stable and reliable than ever before.

Upgrade to Agent 3.4.0 today to take advantage of these new features and enhancements, and to experience a better, more efficient workflow.

New Features

→ Option to Suppress the Suggestion dialog box.

   o Sample Config to change per plugin:

```
"wordConfiguration": {
"suppressSuggestionDialog": true
},
```

→ Auto Classification using AI-ML Suggestions:

   o Sample Config to change per plugin:

```
"wordConfiguration": {
"defaultClassificationValue": "Public",
"autoClassificationConfiguration": [
{ "tagsetId": "e16409a7-1700-4153-9090-3955bc2f0ae8", ----(Classification)
"threshold": 0.1},
{ "tagsetId": "f14fc1f1-8950-40d5-8a29-45909da947d6", ----(Compliance)
"threshold": 0.5}
```

   o Refer to the demo below:

   Auto AI-ML Classification.mp4

→ Give User the option to decide where they want to apply visual labels in PowerPoint.

   o Add the following option in OfficeConfiguration of config.

      ▪ Define title/subtitle property

      ```
      "pageLayoutConfiguration": {
      ```

      ```
      "alwaysShowPopup": true/false,
      ```

      ```
      "option": "allPages"/"titlePageOnly"/"allPagesExceptTitle",
      ```

      ```
      "triggerPagesNumber": 3
      ```

      ▪ TagType Binary should start receiving suggestions.

      ▪ Allow feature toggles to be updated from expert mode.

      ▪ Non-editable visual labels in PowerPoint.

Bug-Fixes

→ Two tags pasted on the same file while classifying with a right click.

→ Set suggested button is not working for binary tags.

→ Persistent Screen Flickering and Cursor Reset Issues during Email Composition.

→ No Department value in EmailActivityEvent.

→ The cancel button is not working as expected for the new H/F pop-up.

→ Outlook footer for RTF misplaced.

→ Right-click classification bypasses 'User lowers classification level' forbiddance.

→ Classification pop-up window showing 'Document' instead of 'Subject' for email classification.

→ Platformhub service not starting.

Known Issues

The revamp of header footer visual labels that include non-editable markings and pop-up box for where to apply Header-footer is only done for Word and PowerPoint in this release, for all the other plugins and explorer it will be available in the next agent.
